

TECHNICAL SPECIFICATIONS - TBS580

GENERAL SPECIFICATIONS:

CABINET and WATER RESERVOIR

The cabinet and water reservoir components are injection moulded structural foam polypropylene (Permatuf[®]). The cabinet and reservoir are UV stabilised and corrosion free. The major components clip together without additional fasteners.

FAN

The fan is a multi blade assembly constructed of glass reinforced polypropylene. The blades are aerofoil shaped. The fan is mounted to the motor shaft by means of a screw-on collet.

FAN MOTOR

Single phase, permanent split capacitor (P.S.C.) motors, with die-cast fully enclosed aluminium frame and IP24 rated enclosure, designed to IEC60034. The motor and fan assembly are supported on an injection moulded glass reinforced polypropylene venturi ring by the stator blades. The fan motor is fitted with a polarised plug for quick removal and replacement.

WEATHERSEAL

The weatherseal consists of two semi-circular, polypropylene blades, hinged and counterbalanced, to open automatically when the fan is activated, and to close when the fan is switched off. Latching is by magnets to steel striker plates.

MAIN CONNECTION DUCT

The main connection duct must incorporate a raw edge or safe edge to avoid fouling of the weatherseal.

AIR FLOW PERFORMANCE SUMMARY

ELECTRICAL CONTROL

The electrical control box is pre-wired within the cooler and incorporates an isolating switch.

A 2 metre long power supply cord is supplied as standard. Provision is included for plug-in connection of drain valve and solenoid kits. A 12 amp circuit breaker is fitted to the underside of the enclosure.

THERMOSTAT CONTROL

TBS model coolers feature the MaglQcool[®] controller, for fully automatic control. Connection of the controller to the control box is via the 20 metre low voltage cable supplied.

WATER CONNECTION

Water supply connection is via a flexible connector which is terminated with a 1/2" BSP compression nipple. An isolating valve must be fitted adjacent to the cooler for service. A drain-down facility is required in areas subject to freezing.

The patented water distribution system is an integral part of the lid, and can be readily viewed from the top by removing the pad frame assembly.

COOLING PADS

Cooling filter pads are black Mini-Cell[^] Chillcel[®] fabricated, honeycomb, high efficiency type.

SPECIAL FEATURES

TBS Coolers are available in "Slate Grey" colour.

Model	Airflow	Motor W	Air Flow - L/s (m ³ /h) versus Static Pressure (Pa)						
	L/s (m³/h) @ 80Pa		0	40	80	120	160		
TBS580	2780 (10010)	950	3170 (11410)	3000 (10800)	2780 (10010)	2520 (9070)	2210 (7960)		

It is a policy of Seeley International to introduce continual product improvement. Accordingly specifications are subject to change without notice.
